

KUKA KR 30-4 KS-F

The KR 30-4 KS-F is a six-axis shelf mounted robot. When compared with the K model, the KS offers a greater depth of working envelope in a downward direction. This robot can tackle up to 30 kg in payload and has a 2233 mm reach.

The KR 30-4 KS-F also takes up less space as it has a reduced overall height. This is advantageous for the loading and unloading of injection molder machines. Overall, the long reach, short lifting distances, and low base frame help to reduce the cycle times for machine tending tasks and provide you with ultimate productivity. It will be paired with the KR C4 controller.

For more information about the KUKA KR 30-4 KS-FS, contact a Robotworx representative today at 740-251-4312.

Robot Information

Robot Specifications

Axes:..... 6
 Payload:..... 30 kg
 H-Reach:..... 2233 mm
 Repeatability: ± 0.06 mm
 Robot Mass: 600 kg
 Structure: Articulated
 Mounting: Floor
